

MODULAR SYSTEMS & SUSTAINABILITY

MODULAR SYSTEMS RENTAL SOLUTIONS IS A COLLECTION OF NO-TOOLS-REQUIRED AND REUSABLE SCENIC BACKDROPS. CREATE THREE-DIMENSIONAL GROUND SUPPORTED STRUCTURES OR HANG FROM A PIPE OR TRUSS. WITH A VARIETY OF DESIGNS, TEXTURES, AND STYLES; EACH SUPERLEVER PANEL IS MADE FROM HIGH-QUALITY RECYCLABLE MATERIALS. MODULAR SYSTEMS ARE THE IDEAL SUSTAINABLE SOLUTION TO RENT FOR YOUR NEXT EVENT.

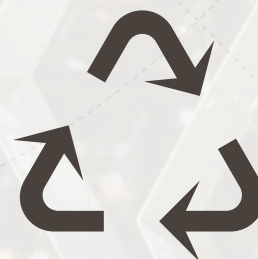

100% Reusable

The Modular Systems rental process cuts down on waste by reusing products and packaging. Our goal is to promote product longevity, so when people rent rather than buy new, there are significant environment savings.

Less CO₂

Modular Systems pack small and play big! Our smaller-sized shipments are effective at reducing CO₂ emissions. We continuously strive to lower our carbon footprint.

Recyclable Materials

We use recyclable materials whenever possible and recycle all worn-out Modular Systems panels. In addition, our zero-waste CNC manufacturing process prevents raw material byproduct from going into the trash.
