

F=FEMALE M=MALE

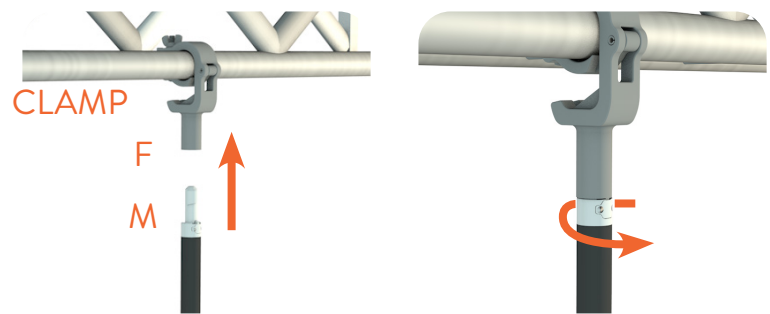

NOTE

The final Poppy will have no female connection point on bottom.

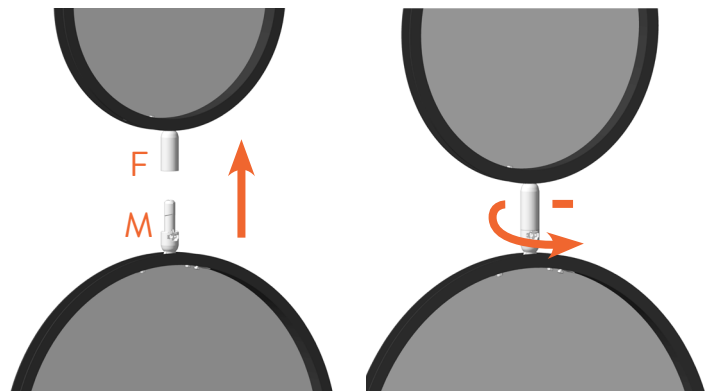

STEP ONE

Attach the hanging clamp to truss. Hand tighten the wing nut on the clamp. Insert the male end of the pole into the female connection point on the hanging clamp. Attach a safety cable (long) to the clamp and pole wrapping around the truss. Twist until you hear the click, indicating a secure connection.

STEP TWO

Insert the male end of the Poppy (or another pole) into the end of pole attached to the base. Twist until you hear the click, indicating a secure connection. Repeat until you have your desired configuration. Attach a safety cable (short) to the eyebolts in each connecting piece.

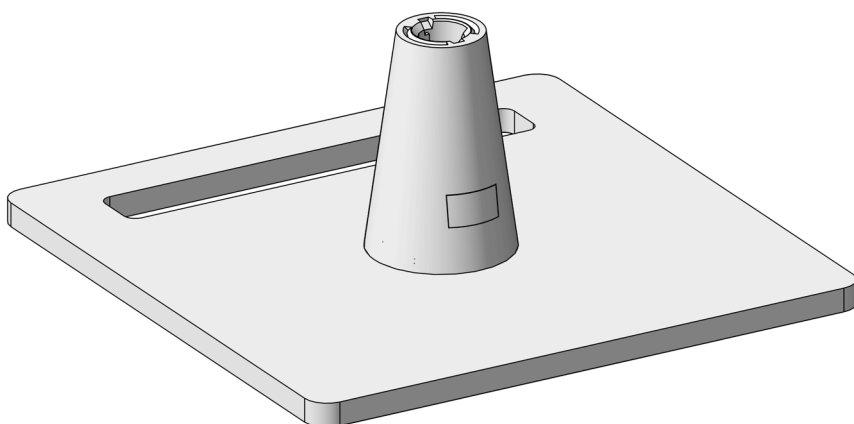

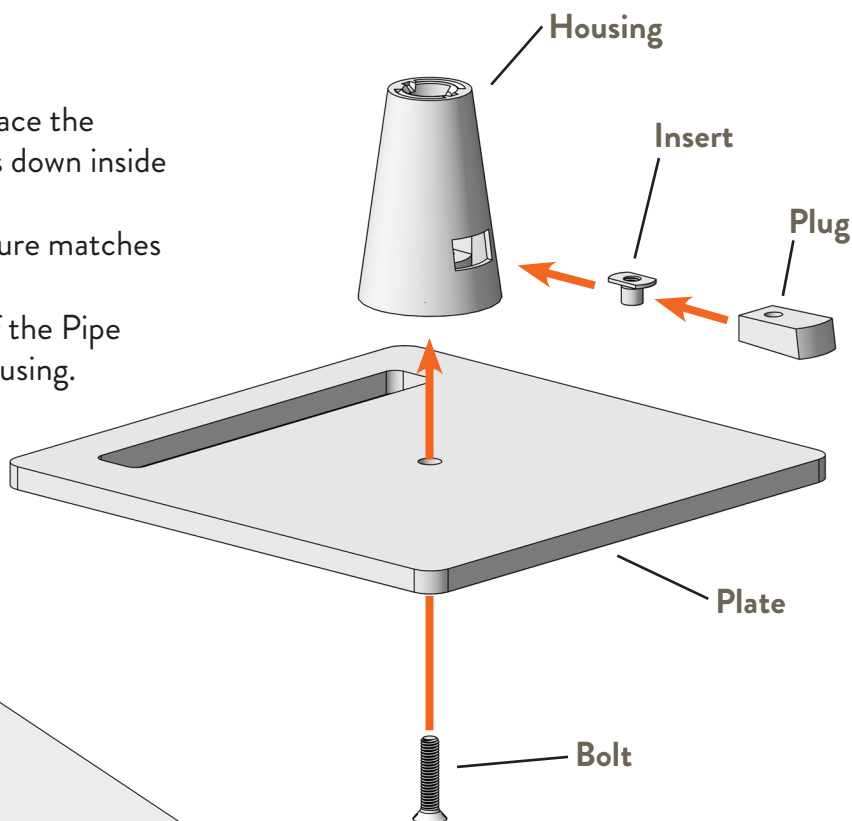

STEP THREE

Insert the male end of the final Poppy into the female connection point. Twist until you hear the click, indicating a secure connection. Attach a safety cable (short) to the eyebolts in each connecting piece.

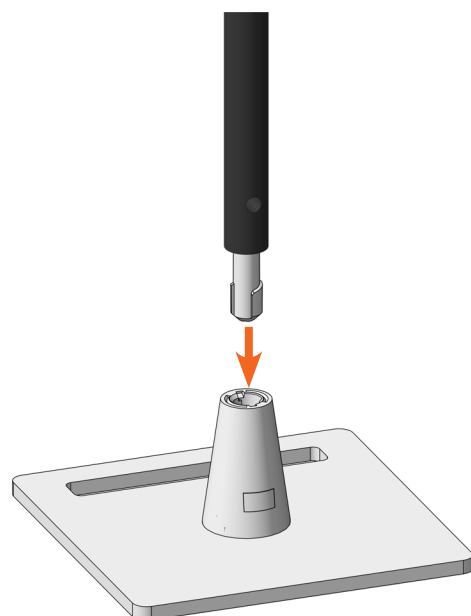

STEP ONE

- If the Insert and plug are unseated, place the Insert inside the housing so that it sits down inside the channel and is flush at the top.
- Insert the plug oriented so the curvature matches with the housing.
- Insert the bolt through the bottom of the Pipe and Base plate and thread into the housing.

STEP TWO

- Insert male end of pole into female end of the adapter.
- Twist to click and lock pole into place.
- Follow the Poppies Standing instructions to finish set-up.

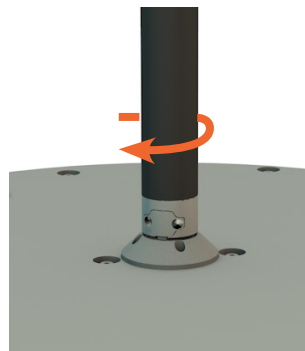

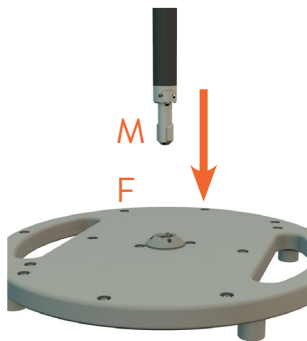

F=FEMALE M=MALE

STEP ONE

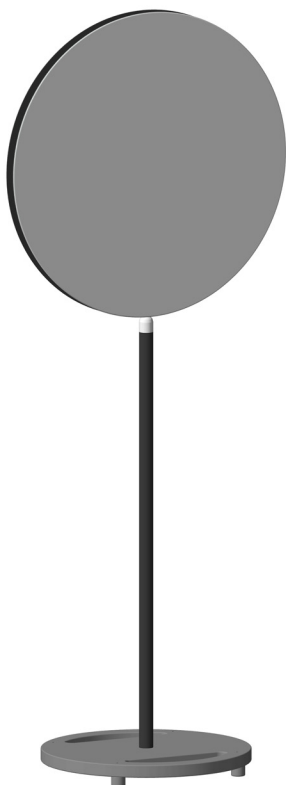

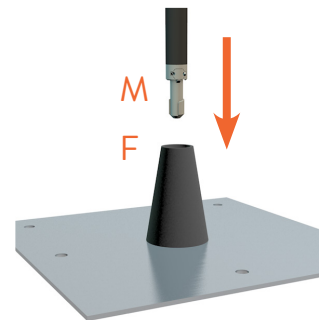

Insert the male end of the pole into the connection point on the base.

OR

Bolt the pipe & base adapter to the pipe & base plate. Insert the male end of the pole into the adapter. Twist until you hear the click, indicating a secure connection. (See Adapter Instruction Sheet)

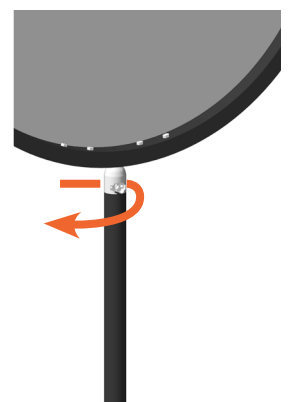

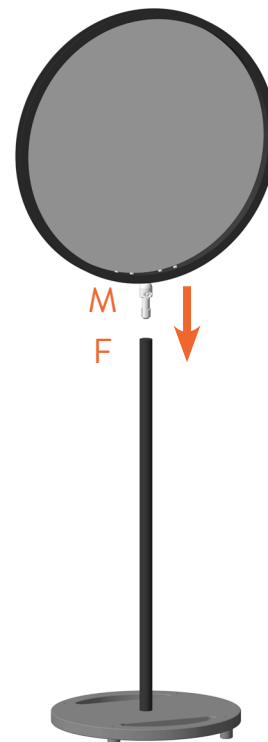

OR

STEP TWO

Insert the male end of the poppy (or another pole) into the end of pole attached to the base. Twist until you hear the click, indicating a secure connection.
