

### STEP ONE

Arrange StretchSet bags directly under rigging points. Unzip top panel.

### STEP TWO

Attach top bar of StretchSet panel to rigging using tieline or SuperLever connectors if using with SuperLever panels.

### STEP THREE

Zip back (upstage) side of StretchSet bag and tuck cover inside.

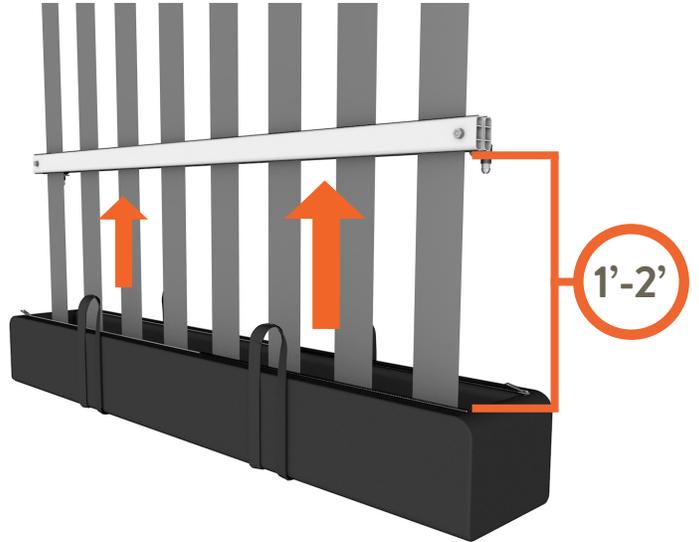

### STEP FOUR

Raise tension bar 1'-2' from bag.

**NOTE:**

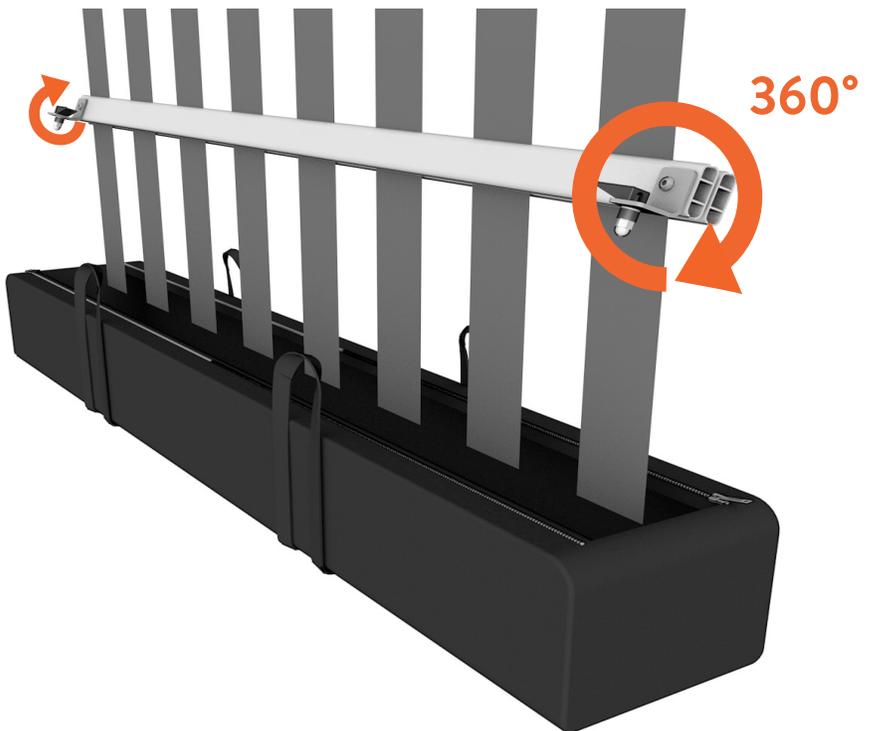

Do not over-stretch StretchSet panels. Only stretch fabric enough to remove slack.

### STEP FIVE

Roll tension bar 360° forward (such that connectors rotate over tension bar, then under).

Pull tension down and attach swell latches to base inside bag.

### STEP SIX

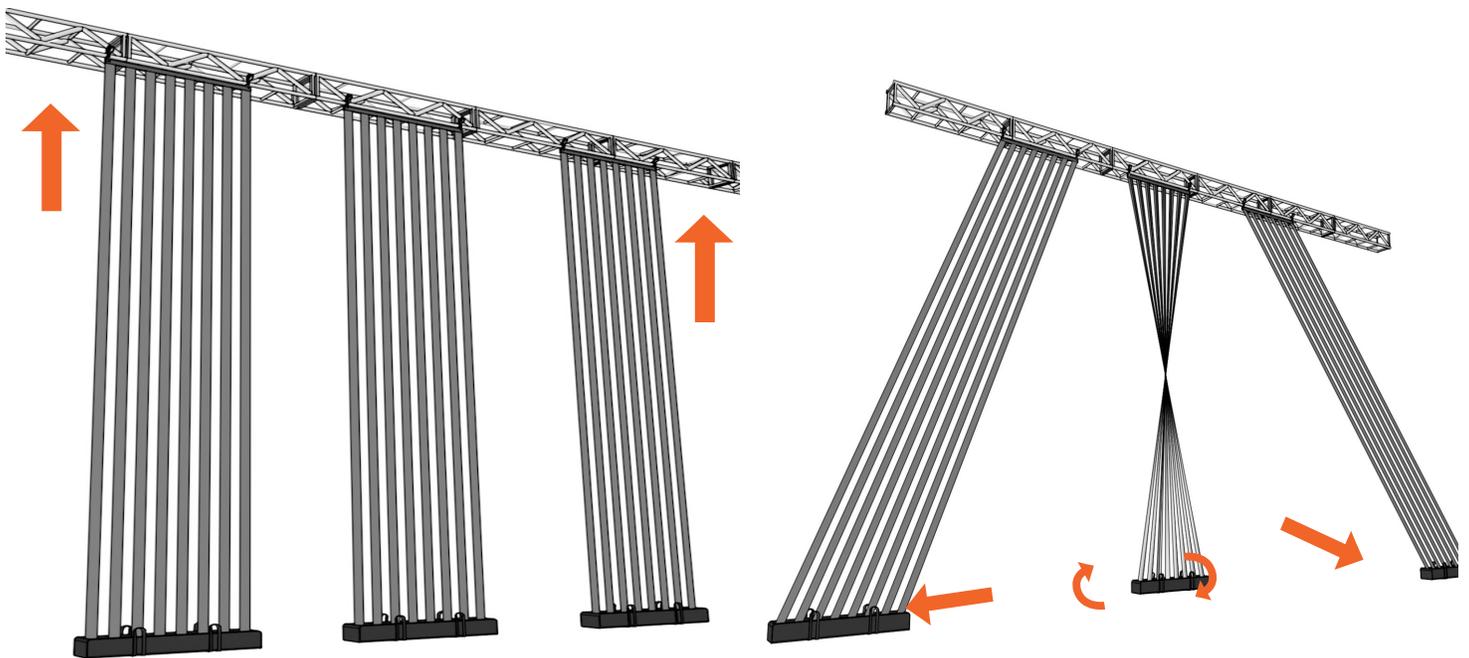

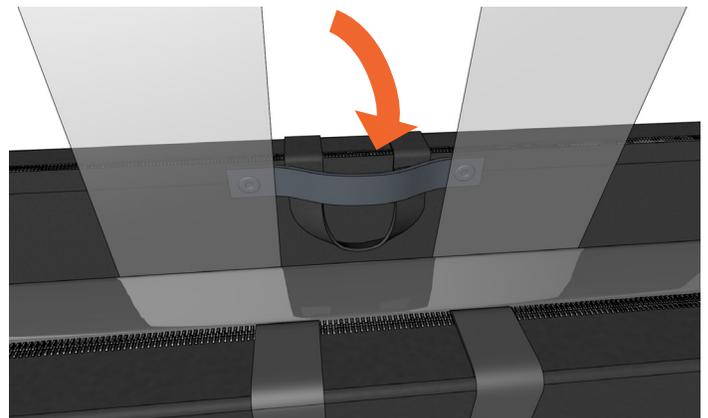

Dress StretchSet bags by tucking excess fabric into bag and tucking handles into stuff straps as shown. Roll StretchSet bag onto its side for a cleaner front.

### STEP SEVEN

Raise rigging to desired height and position StretchSet bases as desired.

#### NOTE:

Do not exceed maximum linear stretch noted in product spec sheets.
